SpinPro SDE300

The SpinPro SDE300 is a three stage counter current extractor. It integrates three mixing and separation devices in one low volume device. The level of mixing and separation can be controlled independently and highly accurate, improving yield and product quality.

SpinPro SDE300 Specifications

- Counter current liquid - liquid extraction
- Individual control over level of mixing and separation
- Short contact time
- Throughput: 250 liters per hour
- Maximum temperature: 200 °C
- Volume: 3 stages, 300 mL
- Footprint: less than 1m²

Spinid is a **GROUPID** company
